

FileVision Hosted Solution

FileVision offers affordable and full-featured Information Relationship Management software as a Hosted solution on a subscription basis. The FileVision Rapid Deploy Hosted solution is currently available for Case Management and Physical Therapy customers. Additional industry-specific Hosted solutions can be easily made available as well. Twelve (12) and twenty-four (24) month contract terms give users flexibility and minimize expenses and risks incurred across application life cycles.

FileVision Hosted Solution

FileVision Hosted deploys, hosts and manages access to FileVision information relationship management software to multiple parties from a centrally managed facility. This means customers are not purchasing software but rather subscribing to all the features and benefits of FileVision on a monthly basis for a specific contract term. Minimal monthly hosting fees and one-time set-up fees make document management, imaging and workflow easy and cost effective for small to medium-sized businesses and/or individual case managers and physical therapists looking for a solution to improve productivity and increase profitability.

Benefits of Information Relationship Management

- Secure and remote access to patient data and documents such as patient demographics, diagnostic reports, notes, appointment schedules and medical records improves efficiency and maintain compliance with HIPAA laws
- Management of time and billing improves accuracy and increases billable hours
- Comprehensive workflow steps case managers through the entire process of managing cases for multiple patients
- Eliminates the possibility of lost or misplaced files

Benefits of FileVision Hosted Solution

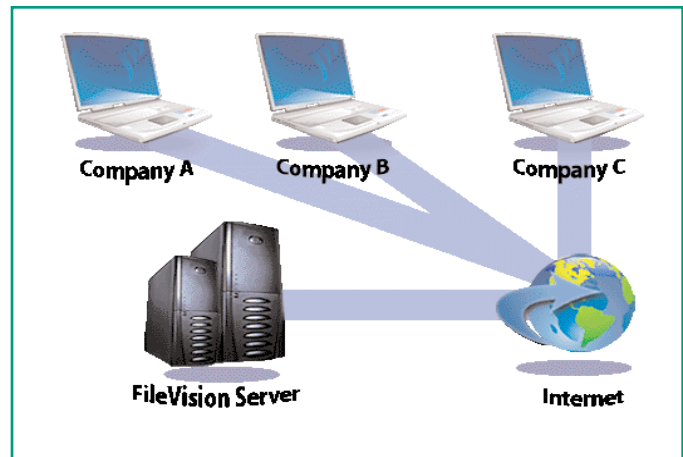

- Easier to adjust to monthly payments when on a lower budget
- Does not require a hardware investment
- Speeds implementation
- Overcomes shortage of qualified technical in-house personnel
- Minimizes the expense and risks incurred across the application life cycle

FileVision Hosted Environment

- Dedicated rack space
- Redundant power sources
- Multiple and redundant fiber routes
- OC 12 Connectivity
- HVAC and environmental controls
- Physical escort for on-site visitors
- Diesel fuel generator
- UPS support
- 24 x 7 monitoring and operational support
- On-site network administrators/engineers

FileVision Hosted Bandwidth

- Serviced by multiple diversely routed connections
- Provides two OC-12 Internet feeds
- Utilizes expandable internet pipes to the equipment
- Firewall system uses stateful packet inspection to protect hosting infrastructure from hackers and vandals
- Pre-configured to automatically detect and thwart Denial of Service (DoS) attacks

Easy monthly payments, no hardware investment, faster implementation, and no technical in-house personnel needed are all benefits of the FileVision Information Relationship Management Hosted solution.
